# FREE ENERGY SECRETS!

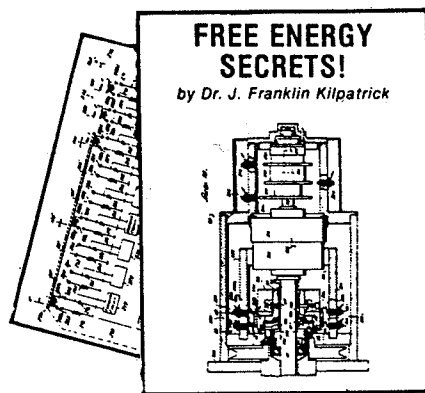

BY Dr. J. Franklin Kilpatrick

Energy shortages are threatening our very survival. Supplies of conventional fuels appear to be running out. Oil Companies raise prices, conservationists advocate unreliable solar, wind and water power. Conventional scientists pursue the elusive goal of nuclear fusion.

Meanwhile, Dr. J. Franklin Kilpatrick is working on FREE ENERGY! This is not solar, wind, wood, methane, hydrogen, geothermal or any other conventional means of producing energy. It is a totally new source of energy which violates no known law of physics!

The theoretical concepts are extremely complex and are closely related to the fundamental quantum structure of matter. However the average high school student can construct a simple (energy producing) working model for under \$15.00. In this new edition Dr. Kilpatrick shows you how to build such a model.

You get diagrams, schematics and narrative description of work that has already been done in this field, including electrical generators and mechanical motors. This is not some obscure rip-off. This concept of energy production has already been the basis for 4 U.S. Patents reproduced in total in this book. The patent office will not grant a patent on any invention that does not work. So you can be sure that these devices actually operate as claimed.

The potential of this technology is so great that it could provide all of our energy needs in the next century. Only once in a life-time does such a revolutionary breakthrough come along. This is your opportunity to get in on the ground floor.

What does all of this mean to you? The average American family spends over \$2000/year on fuel and we import \$45 Billion worth of petroleum annually. This is your money! Don't let the major energy companies hide the technology that could save you at least \$2000 per year.

You can do your part by getting a copy of this book and showing it to your friends. Get them involved; while your voice alone may not be heard, even the Kremlin will listen when millions of people speak. FREE ENERGY SECRETS may be the best investment you ever make!!

Cat No 2000

\$15.00

You get:

- Plans and Instructions for building a working model.
- Copies of 4 U.S. Patents employing free energy.
- Formerly secret military intelligence report confirming free energy.
- Text, diagrams and other rarely seen info.

## —ORDER FORM—

Yes I'm tired of being ripped off by the energy companies. Please rush me a copy of FREE ENERGY SECRETS. I understand that if I am dissatisfied for any reason I may return it for a full refund.

☐ I have enclosed \$15.00 for each copy of FREE ENERGY SECRETS delivered via Special 4th Class book-rate mail in the United States and Canada.

☐ I have enclosed \$20.00 per copy: \$15.00 for FREE ENERGY SECRETS plus \$5.00 for AIRMAIL DELIVERY to anywhere in the world.

# Research & Development

---

Post Office Box 873, Concord, North Carolina 28025

Thank you for writing.

Here is the brochure you requested about our antigravity development program and the NIPD II system.

NIPD II flies without the use of rockets, jets, magnets, or any moving parts. It can hover and accelerate in the atmosphere or the vacuum of space.

NIPD II uses a combination of little known physical effects to produce "electronic levitation" or "antigravity". The NIPD II information kit will enable you to build your own flying model and fully understand how it works.

We are making this unique offer in an effort to spread this valuable information among the widest possible group of scientifically aware individuals. We know that further development of NIPD technology will require a broad base of public understanding and support.

This is not a "rip-off". It is a revealing look at a strange and suppressed area of technology which is solidly based on modern physics. If you are dissatisfied for any reason, you may simply return the material for a full refund.

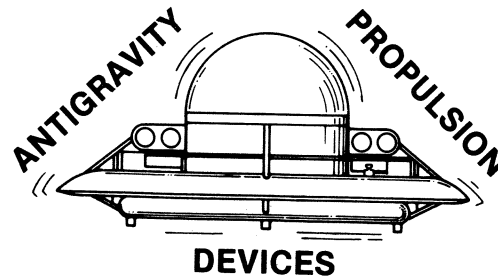

Good luck in your research.

Sincerely,

*Bernard C. Ebershaw*

Bernard C. Ebershaw  
Research Director

#### Greetings:

ANTIGRAVITY is a hot item today. Flying Saucers, UFO's and strange experimental government projects are all hinting to us the nearness of anti-gravity.

We think the NIPD II is a hot item too. NIPD stands for Net Inertial Propulsion Device. NIPD means ANTIGRAVITY. Our proposal employs a Net Inertial Force Field which can be directed to counteract and overcome the force of gravity.

The perfected NIPD II can:

- Propel vehicles to relativistic velocities.
- Propel in any direction through air, or the vacuum of space.
- Operate without moving parts, magnets, or rockets.

It is not a source of energy. It TRANSFORMS power from conventional sources into the force of propulsion.

Here are some of the details that you will receive: THEORETICAL DATA -- Why does the NIPD work? How does it apparently DEFY Newton's third law of motion?

SIMPLE WORKING MODEL -- How can the scientific layman demonstrate the principles of the Net Inertial Force Field? Our simple, FLYING model has been built for less than \$100.00.

The NIPD II is as much a breakthrough in the field of simplicity as it is in the field of anti-gravity. There are NO COMPLICATED ideas involved. You will find the theory no more complex than the one behind your auto, the design less complex!

We are not selling NIPD Systems. We are offering information kits consisting of:

- A 120 page manual on anti-gravity theories and applications.
- Complete plans for building the small FLYING model.
- A complete bibliography to assist you in further research.

In an effort to spread this information among a wide group of interested individuals, YOU can get both the THEORETICAL DATA (amply complete and thorough to satisfy the technical mind) and the PLANS for the FLYING model (designed to allow the mechanical mind to follow the concept, build a working model, or both) for only \$20.00

YOU GET EVERYTHING -- both plans and theoretical data for only \$20.00 postage paid!

#### CONSIDERATIONS

The wording and content of this brochure has been chosen carefully to provide maximum information. No attempt is made to mislead the reader; this is not a "gag" or "gimmick" product.

The plans offered herein are those for the construction of the model buildable for less than \$100.00. Variations in materials and dimensions are allowed so that an individual builder could possibly use some materials on hand, and so that some modifications or improvements of design can result. "Theoretical data" as used herein refers to the physical theory upon which this device operates.

Research & Development will not be responsible for accidents in connection with the experimentation of this device; warnings for safety are included in the plans. Due to the volume of mail received, we cannot promise to answer all inquiries requiring personal attention; we do make a more than reasonable attempt in this regard.

All orders from outside the U.S. must be submitted in money orders payable in U.S. dollars. Standard procedure is to send all orders via 4th Class Book Rate mail. Airmail delivery to any spot in the world is available for \$4.00 additional. The U.S. Postal System and all publishers of magazines in which we advertise have copies of this brochure.

ACT TODAY!! REMIT \$20.00 CHECK OR MONEY ORDER. NO C.O.D. MAKE ALL CHECKS PAYABLE TO: Research & Development.
